Professor Igor Tamm
Lebedev's Institute for Physical Research
Academy of Sciences
Moscow, U. S. S. R.

Dear Dr. Tamm:

I am enclosing a copy of a letter from Dr. Crick at Cambridge, which presumably settles our previous discussion very much in your favor. I wish I could recall some of the qualifications that I had in mind, but they are out of order at the present time.

I will be very happy to hear from you concerning the scientific issues on biological exploration of the planets. The time, of course, is growing very short.

With best regards.

As ever,

Joshua Lederberg
Professor of Genetics

Enc.

Air Mail

P. S. You will, of course, take note of my new address, where I have been happy to be for the past week.
